AAC are on a mission

We want to be the most sustainable, specialist pre-treatment & powder coating company in the UK .

AAC is extremely proud to be officially Carbon Neutral certified. This is a definitive demonstration of our commitment to the environment and a sustainable future for all.

AAC is the UK's leading independent specialist provider of pre-treatment and powder coating services to the UK architectural sectors, including the commercial, residential and education markets. Founded in 2005, and with senior management boasting over 100 years of combined experience in the powder coating industry, AAC has a demonstrable track record of providing the very best powder coating service to our valued customers.

AAC are experts in coating a wide range of products including solar shading, extrusions, cladding, rainwater goods, curtain walling, windows, doors, perimeter and security fencing and much more ...

Quality is the foundation that our business and reputation is built upon.

- Multi metal pre-treatment facility
- Production facility with capacity to coat up to 8m in length
- Extensive range of colours available in stock
- In house specification team to support and guide
- Management team with over 40 years' experience
- Quality Assurance and in house testing
- Nationwide Logistics

AAC is committed to the highest quality standards as demonstrated by our Qualicoat, Qualicoat Seaside and BSI 9001 accreditation. AAC is an approved applicator for all major powder manufacturers and members of ALFED. These accreditations sit well alongside the Company's quality and service ethos, resulting in long lasting relationships with our customers based on our commitment to quality and service.

AAC has invested significantly in its infrastructure and is able to offer customers a comprehensive and high quality coating service from its 50,000 sq. ft purpose built, state-of-the-art facility based in Wednesfield, Wolverhampton, in the heart of England. AAC's operations are strategically located to facilitate an efficient distribution service to its customers, benefiting from the sole use of a self-contained and secure industrial park.

We've got it covered!
